Dataset Overview & Scope

zomato

Global Restaurants	Countries	Cities	Currency Labels	India Share %	Global Delivery %
9,551	15	141	12	90.6%	25.66%

India accounts for 90.6% of all restaurants

Currencies and delivery data vary too much to compare countries

CountryName	Currency	Global Restaurants	Global Delivery %
India	Indian Rupees(Rs.)	8,652	28.01%
United States	Dollar($)	434	0.00%
England	Pounds(?)	80	0.00%
Brazil	Brazilian Real(R$)	60	0.00%
South Africa	Rand(R)	60	0.00%
United Arab Emirates	Emirati Diram(AED)	60	46.67%
New Zealand	NewZealand($)	40	0.00%
Turkey	Turkish Lira(TL)	34	0.00%
Australia	Dollar($)	24	0.00%
Philippines	Botswana Pula(P)	22	0.00%
Indonesia	Indonesian Rupiah(IDR)	21	0.00%
Qatar	Qatari Rial(QR)	20	0.00%
Singapore	Dollar($)	20	0.00%
Sri Lanka	Sri Lankan Rupee(LKR)	20	0.00%
Canada	Dollar($)	4	0.00%
Total		**9,551**	**25.66%**

Why India?

1. **Concentration:** India has 8,652 of the 9,551 restaurants (90.6%).
2. **Currencies:** cost is recorded in 12 currency labels with no conversion rate, and some labels are wrong (“Dollar” covers 4 countries, the Philippines shows “Botswana Pula”). Costs can only be compared within one currency.
3. **Delivery data:** online delivery is recorded only for India (28%) and the UAE (47%, but only 60 restaurants). All other countries show 0%.
4. **Sample size:** apart from India, no country has more than 434 restaurants, and most have 20–80. That’s too few for reliable city or cuisine insights.

15 countries and 9,551 restaurants.

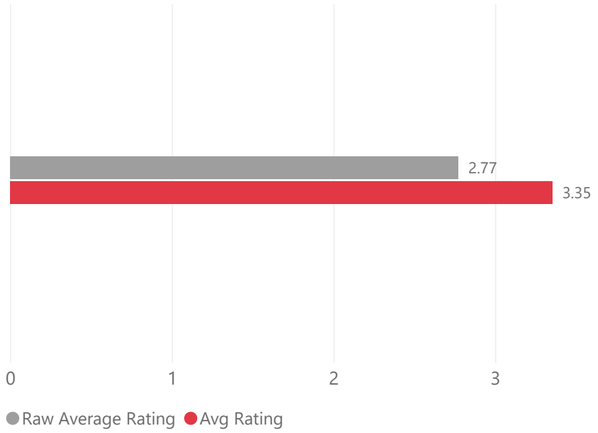

Data Quality

what was wrong with the raw data, how I fixed it, and how much it changed the results

zomato

Not Rated yet (fewer than 4 votes)	Zero Cost Rows	Raw Average Rating	Avg Rating
2139	9	2.77	3.35

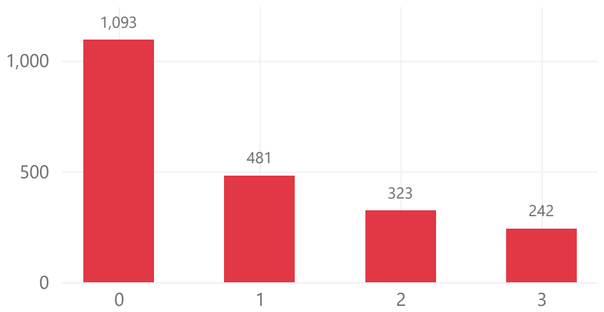

Removing 2,139 placeholder ratings lifts the average from 2.77 to 3.35

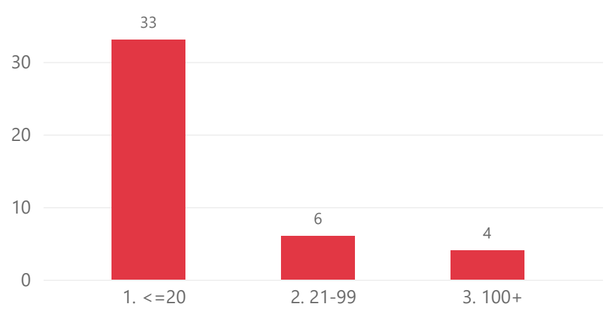

Data cleaning log: issues found, fixes applied, impact

#	Impact	Issue	Rows Affected	Treatment
1	Avg rating 2.77 → 3.35	Rating 1.0 used as placeholder (fewer than 4 votes)	2,139	Set to blank; flagged with is_rated
2	Minimal (₹623 → ₹624); fixed for correctness	Average cost for two = 0	9	Set to blank
3	Avoids small-sample bias	Small cities (20 or fewer restaurants)	33 of 43 cities	City comparisons limited to cities with 100+ restaurants
4	Costs are comparable	12 currency labels, some mislabelled	15 countries	Scope limited to India (₹ only)
5	Avoids a misleading metric	Is_delivering_now is a point-in-time snapshot	Whole column	Column dropped
6	No information lost	Switch_to_order_menu has one value only	Whole column	Column dropped

Not rated yet: 2,139 restaurants with 0–3 votes were shown as 1.0

Outside Delhi NCR, cities are capped at about 20 listings, so only 4 cities support comparison

Key Insights

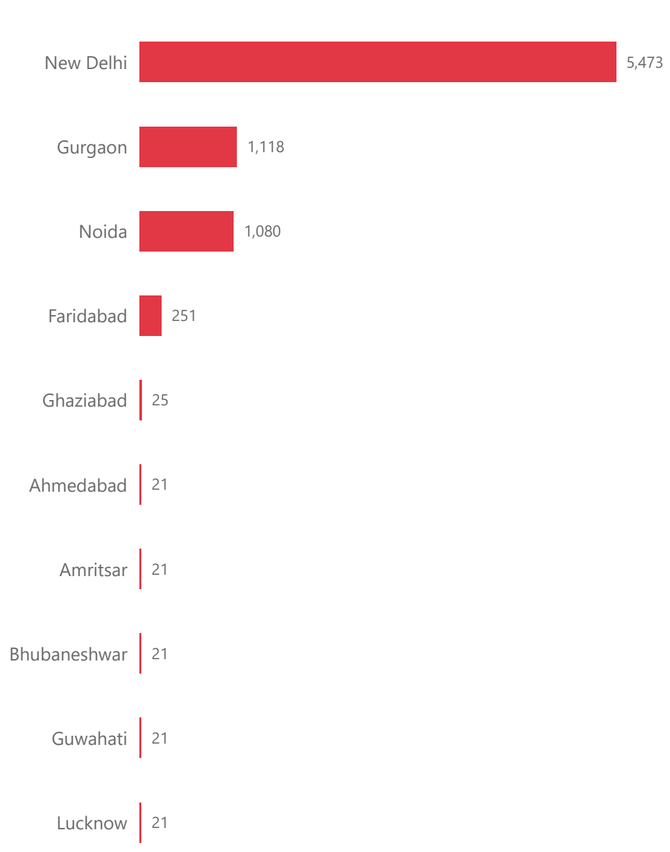

1. **A 1.0 rating meant "not rated yet", not "bad".** 2,139 restaurants (25% of India) had fewer than 4 votes, and the raw data gave every one of them a 1.0 rating. Half of them (1,093) had zero votes. The rest had 1 vote (481), 2 votes (323) or 3 votes (242).
2. **Fixing it changed the headline number.** With the placeholders included, India's average rating is 2.77. Excluding them gives the real average of 3.35. Every rating on the following pages uses the corrected figure.
3. **Not every issue mattered.** 9 restaurants had a cost of ₹0. Removing them moved the average cost by only ₹1 (₹623 → ₹624). It was fixed for correctness, but it doesn't change any conclusion.
4. **Outside Delhi NCR, the data is a sample, not the market.** 28 cities, including Mumbai, Bangalore, Chennai and Kolkata, have exactly 20 restaurants each, which looks like a collection cap. Only 4 cities (New Delhi, Gurgaon, Noida, Faridabad) have 100+ restaurants. City comparisons therefore use these 4 only.
5. **Two columns were dropped as unreliable.** Is_delivering_now is a point-in-time snapshot, and Switch_to_order_menu has the same value for every restaurant. Neither supports analysis.

Market Overview

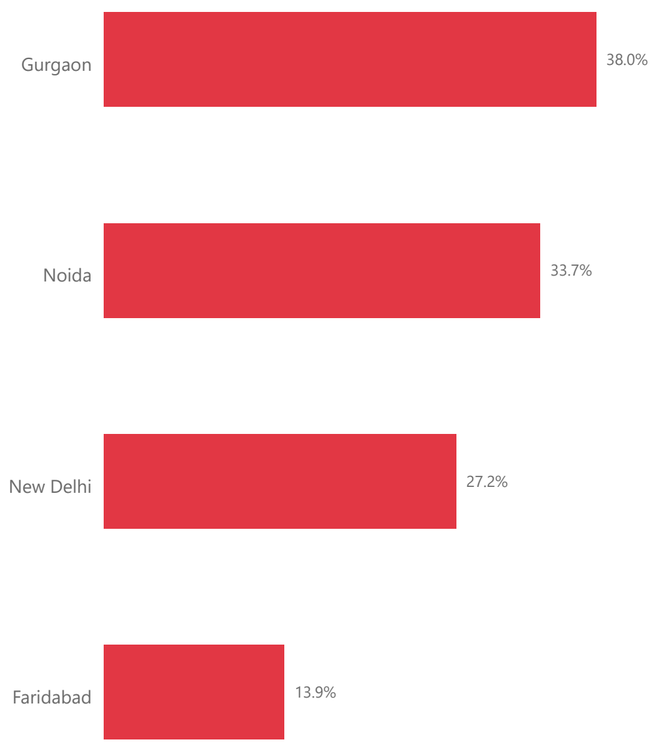

Where are Zomato's Indian restaurants, and how do the main cities compare?

Total India Restaurants	Rated Restaurants	Rated %	Avg Rating	Delivery %	Avg Cost for Two
8,652	6,513	75.28%	3.35	28.0%	₹ 624

Delhi NCR = 92% of Indian restaurants; 33 of 43 cities have 20 or fewer.

Gurgaon delivers most (38%), Faridabad least (14%)

Gurgaon leads on delivery, rating share and price

City	Total India Restaurants	Rated %	Avg Rating	Delivery %	Avg Cost for Two
Gurgaon	1,118	79.61%	3.33	38.0%	₹ 714
New Delhi	5,473	73.96%	3.30	27.2%	₹ 596
Noida	1,080	64.44%	3.16	33.7%	₹ 539
Faridabad	251	60.16%	3.10	13.9%	₹ 448
Total	**7,922**	**73.02%**	**3.28**	**29.2%**	**₹ 600**

Extra Delhi restaurants on delivery at Gurgaon's rate

Delhi Delivery Gap

592

Key Insights:

1. **Delhi NCR is the dataset.** 7,947 of India's 8,652 restaurants (92%) are in Delhi NCR, and New Delhi alone has 5,473 (63%). The other 38 cities share just 705 restaurants.
2. **Gurgaon leads on delivery and price.** It has the highest delivery adoption (38.0%), the highest rated share (79.6%) and the highest cost for two (₹714). It looks like the most mature, premium market in NCR.
3. **New Delhi has a delivery gap.** Only 27.2% of New Delhi restaurants offer online delivery. At Gurgaon's rate, about 592 more would deliver, which is the biggest delivery opportunity in the data.
4. **Faridabad trails on every measure.** It has the lowest delivery (13.9%), rated share (60.2%), average rating (3.10) and cost (₹448). It's an under-penetrated, budget market.
5. **Cities outside NCR look like a curated sample.** All 705 restaurants there are rated (100%), with a higher average rating (3.94) and cost (₹895) than NCR (3.28, ₹600). This suggests only popular restaurants were listed for those cities, so don't compare them directly with NCR.

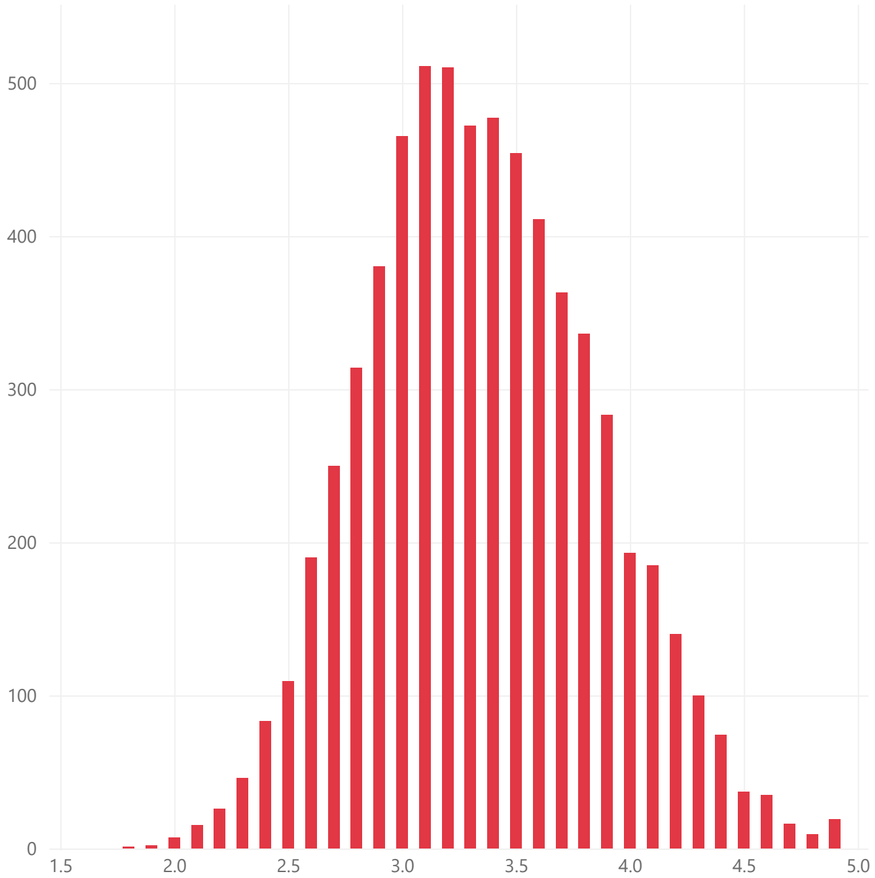

Independent analysis of a public Zomato dataset (India, 8,652 restaurants) · Not affiliated with Zomato

Ratings & Engagement

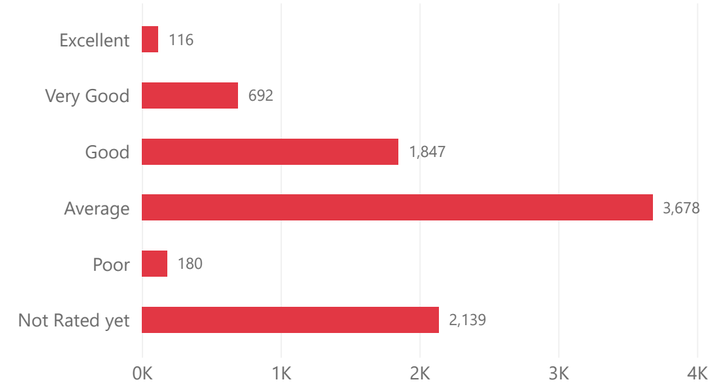

how restaurants are rated, and what drives engagement (votes).

Total India Restaurants	Rated Restaurants	Rated %	Avg Rating	Avg Votes	Median Votes
8,652	6,513	75.28%	3.35	137	24

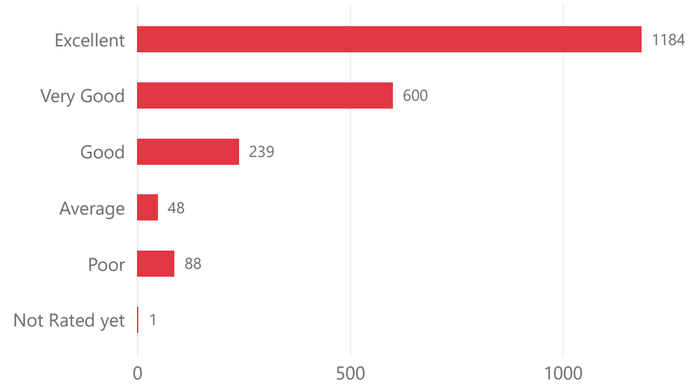

Most ratings cluster between 2.8 and 3.8

42% of restaurants are rated “Average”; only 9% are Very Good or better

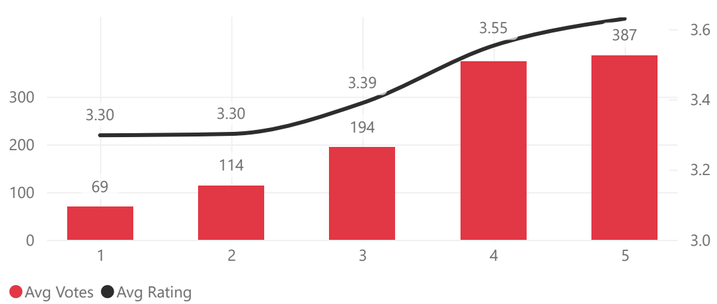

Excellent restaurants get about 25× more votes than Average ones

More cuisines, more votes and higher ratings

No. of cuisines (5 = 5+)

Key Insights:

1. **Ratings cluster in the middle.** The distribution is roughly bell-shaped and peaks around 3.1–3.2. Most rated restaurants score between 2.8 and 3.8. Very few score below 2.5 or above 4.5.
2. **“Average” dominates.** 3,678 restaurants (42%) are rated Average. Only 808 (9%) reach Very Good or Excellent, so a high rating is rare.
3. **A quarter aren’t rated.** 2,139 restaurants (25%) have fewer than 4 votes, so they carry no real rating. They’re excluded from Avg Rating rather than counted as 1.0.
4. **Engagement follows quality at both ends.** Excellent restaurants average 1,184 votes, about 25× more than Average (48). Poor restaurants (88) also get more votes than Average ones, so customers vote most when an experience is very good or very bad.
5. **Variety is linked to engagement.** Average votes rise from 69 for single-cuisine restaurants to 387 for those with 5+ cuisines, and ratings rise from 3.30 to 3.63. The pattern holds within the same price range. It is an association, not proof of cause.

Independent analysis of a public Zomato dataset (India, 8,652 restaurants) · Not affiliated with Zomato

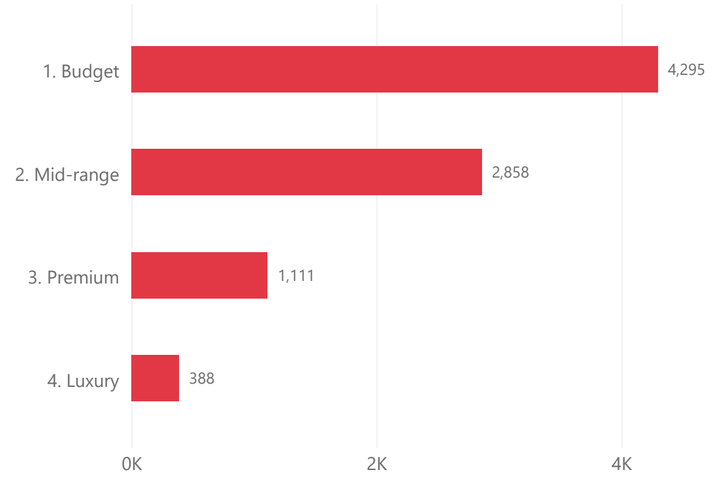

Price & Value

what a meal costs, and whether paying more gets you a better-rated restaurant.

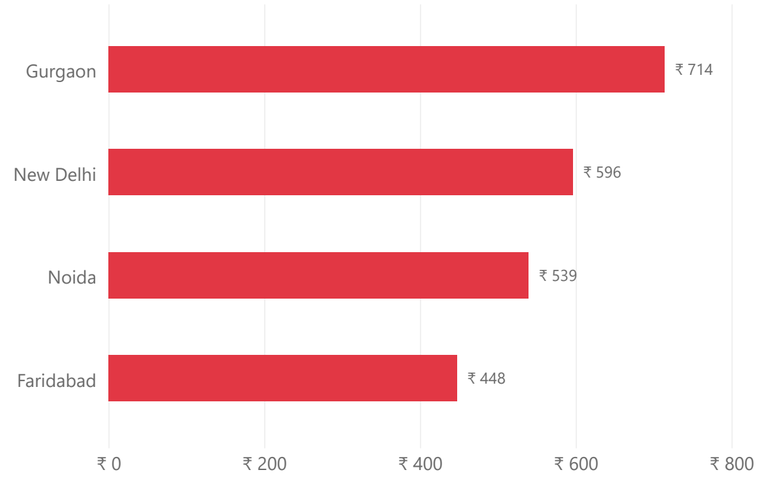

zomato

Avg Cost for Two	Median Cost	Budget Share %	Avg Rating	Value Score
₹ 624	₹ 450	60.66%	3.35	5.37

Half of all restaurants are Budget (under ₹500 for two)

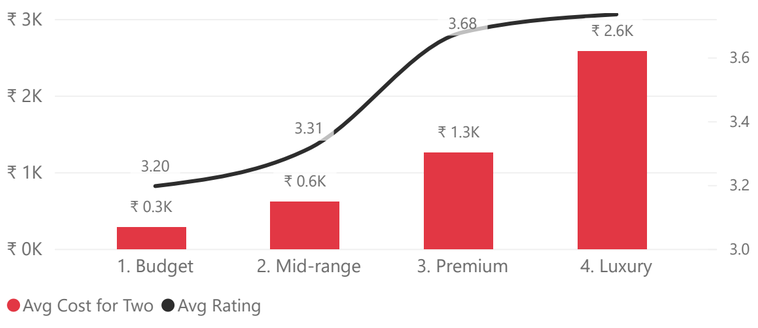

Gurgaon is the most expensive city at ₹714 for two

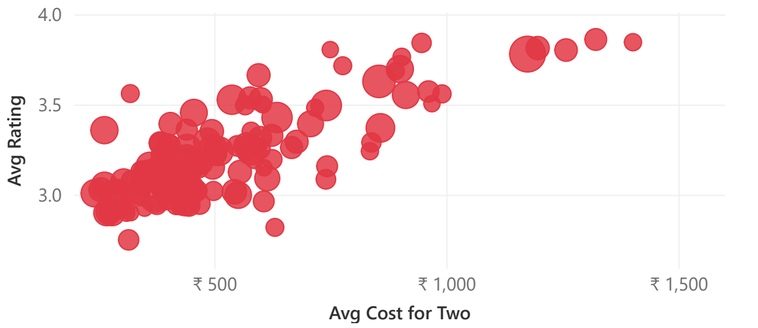

Top 10 value localities: rated 3.5+ at the lowest cost

Value Rank	Locality	City	Total India Restaurants	Avg Cost for Two	Avg Rating	Value Score
1	Jama Masjid	New Delhi	26	₹ 319	3.56	11.16
2	Sector 37	Noida	25	₹ 440	3.57	8.11
3	Vijay Nagar	New Delhi	31	₹ 489	3.61	7.38
4	Satyaniketan	New Delhi	79	₹ 538	3.53	6.56
5	Netaji Subhash Place	New Delhi	48	₹ 600	3.53	5.88
6	Kailash Colony	New Delhi	22	₹ 605	3.50	5.79
7	DLF Phase 4	Gurgaon	21	₹ 750	3.80	5.07
8	Shahpur Jat	New Delhi	26	₹ 777	3.72	4.78
9	Rajouri Garden	New Delhi	99	₹ 855	3.63	4.24
10	Select Citywalk Mall| Saket	New Delhi	25	₹ 904	3.76	4.16

Ratings rise with price, but flatten after Premium

Higher-cost localities rate higher, but cheap areas vary widely

Key Insights:

1. **Most of the market is cheap.** Half of all restaurants (4,295, or 50%) are Budget, with an average cost for two of ₹285. 61% cost ₹500 or less. The median meal for two is ₹450, below the ₹624 average, because a few expensive restaurants pull the average up.
2. **Paying more buys a better rating, up to a point.** Average rating rises from 3.20 (Budget) to 3.31 (Mid-range) and 3.68 (Premium). The jump to Luxury adds only +0.06 (3.74) for about twice the price (₹2,583 vs ₹1,258). Premium is the sweet spot.
3. **Cheap restaurants are less visible.** Only 60% of Budget restaurants are rated, compared with 97% of Premium and Luxury. Many low-cost places don't get enough votes to earn a rating.
4. **Gurgaon is the priciest city.** Its average cost for two is ₹714, against ₹596 in New Delhi, ₹539 in Noida and ₹448 in Faridabad. This fits Gurgaon's premium profile on the Market Overview page.
5. **Good value exists, mostly in Delhi.** 9 of the 10 best-value localities are in New Delhi NCR, and all rate 3.5 or higher. Jama Masjid stands out: a 3.56 rating at ₹319 for two, well below the median cost.
6. **Cost and rating move together, but not tightly.** The scatter shows higher-cost localities tend to rate higher. Low-cost localities vary widely (about 2.7 to 3.6), so a cheap area can still be a good one.

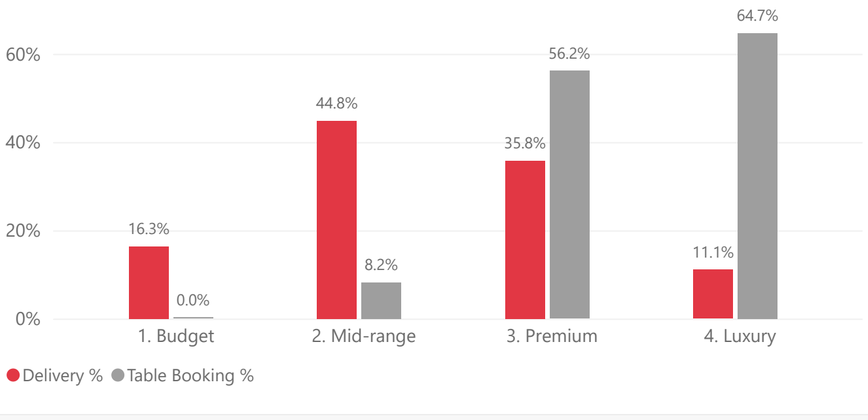

Delivery & Services

who offers online delivery and table booking, and does offering them link to more engagement?

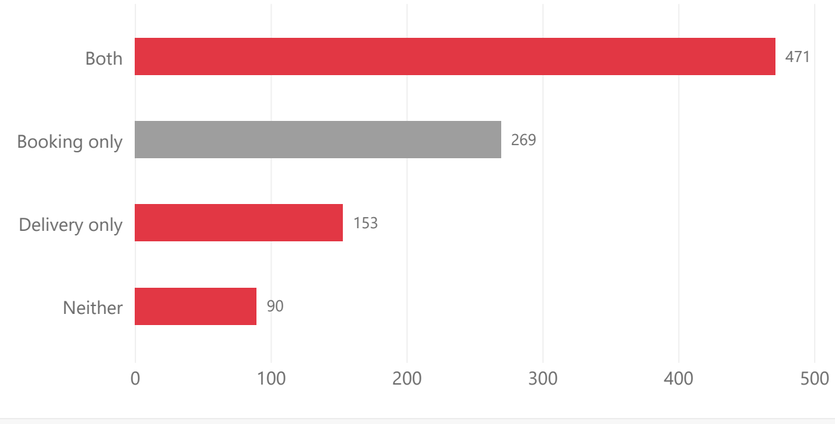

zomato

Table Booking %	Not Delivering	Delhi Delivery Gap	Delivery %
12.8%	6,229	592	28.0%

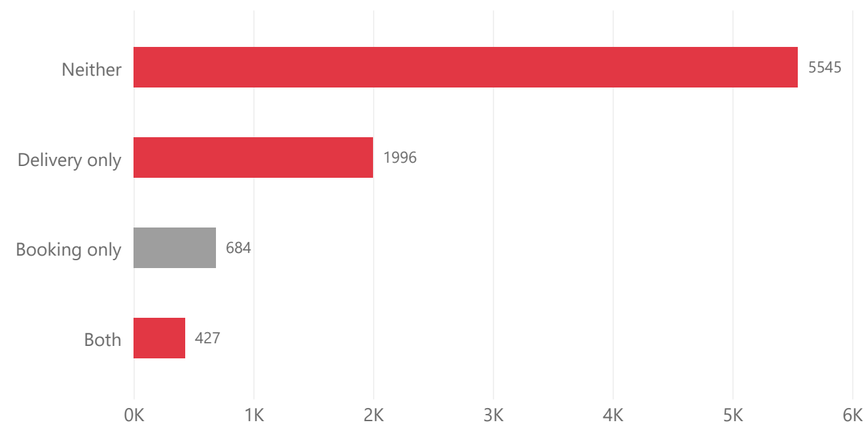

Delivery peaks at Mid-range; booking takes over at Premium

Restaurants offering both services get about 5× more votes

64% of restaurants offer neither delivery nor booking

Top 10 localities with the most restaurants not on delivery

Locality Key	Total India Restaurants	Not Delivering	Delivery %	Avg Rating
Shahdara (New Delhi)	87	87	0.0%	3.00
Connaught Place (New Delhi)	122	70	42.6%	3.78
Krishna Nagar (New Delhi)	76	69	9.2%	3.09
Mahipalpur (New Delhi)	69	67	2.9%	2.96
Chandni Chowk (New Delhi)	67	66	1.5%	3.36
Mukherjee Nagar (New Delhi)	68	66	2.9%	3.01
Mayur Vihar Phase 1 (New Delhi)	84	62	26.2%	2.99
Najafgarh (New Delhi)	60	60	0.0%	2.90
Vasundhara Enclave (New Delhi)	62	60	3.2%	3.05
Paharganj (New Delhi)	64	59	7.8%	3.00
Palam (New Delhi)	60	59	1.7%	2.90

Key Insights:

1. **Most restaurants offer neither service.** 5,545 of 8,652 restaurants (64%) have no online delivery and no table booking. Only 28% deliver online, and 13% take table bookings.
2. **Delivery is a mid-market service.** Online delivery peaks in Mid-range restaurants (44.8%), drops at Premium (35.8%), and is rare at both ends: Budget 16.3% and Luxury 11.1%.
3. **Table booking is a premium service.** It's almost absent in Budget restaurants (1 restaurant), 8% in Mid-range, then jumps to 56% in Premium and 65% in Luxury. The two services hardly overlap: delivery serves the middle of the market, booking serves the top.
4. **More services are linked to more engagement.** Average votes rise from 90 (Neither) to 153 (Delivery only), 269 (Booking only) and 471 (Both), about 5× more for "Both". Part of this is price, since "Both" restaurants cost ₹1,278 for two on average. But the link holds within the same price band: Budget restaurants with delivery average 81 votes against 28 without, about 3×.
5. **There's a large delivery opportunity.** 6,229 restaurants don't deliver, and the gaps are concentrated in specific New Delhi localities. Shahdara has 87 restaurants with 0% delivery. Connaught Place stands out: 70 restaurants not delivering despite a high average rating (3.78), which makes it the strongest target.
